// }

// Education

B.S. Software Development
Bellevue University (Online)

Jun 2022 - Expected Oct 2026

GPA: 4.0 · Dean's List: Jun 2024 - Present

COURSEWORK: Python Java SQL

Secure Software Dev

Server Scripting/Dev Web Design

DevOps

// class Experience {

warehouseWorker() // Inventory Control & QA

May 2017 - Present

@ Target Distribution · Cedar Falls, IA

- > Track and analyze product defects using the IMS, identifying root causes like over/under-receiving and incorrect pulls to reduce recurring errors.
- > Move inventory systematically and physically through the warehouse, maintaining accuracy at each stage of the supply chain.
- > Developed custom Excel tools using macros and VBA to reformat raw IMS data into management-ready reports, and built pallet location trackers adopted across the team.
- > Emergency Response Team member - Evaluate medical situations and run high-stress medical emergency situations and keep injured or sick team members calm and safe while Emergency Services responds.

storeManager() // Final position after 11 yrs

Jul 2006 - Apr 2017

@ Kwik Star · Iowa

- > Managed all daily store operations for 5 years including scheduling, daily paperwork, running and planning training meetings, performance management, customer service, and performed duties alongside co-workers as needed.
- > Maintained a high quality staff: including performance management, leadership development, hiring, firing, resolving personality conflicts.
- > Built an Excel lottery ticket inventory counter and authored a bookwork SOP Document now used as a standard document company-wide.
- > Authored a bookwork SOP and troubleshooting guide adopted as standard documents used company-wide across all locations, and picked up by the training department as a tool for training new bookkeepers.
